EXPERIMENT – 1

Content Creation and Scheduling for Multi-Platform Campaigns

Aim

To create platform-specific social media content and schedule it effectively across multiple digital platforms for a marketing campaign.

Objective

- To understand content adaptation for different social media platforms
- To create engaging promotional content
- To prepare a content calendar
- To schedule posts using social media tools

Tools Required

- Canva
- Meta Business Suite
- Buffer / Hootsuite / Later
- Google Sheets / Excel
- Instagram / Facebook / LinkedIn / X (Twitter)

Theory

Content creation is the backbone of social media marketing. Each social media platform has a unique format, audience behavior, and communication style. Therefore, marketers must create content that aligns with the platform and the intended target audience.

For example:

- Instagram focuses on visual storytelling
- LinkedIn emphasizes professional communication
- Facebook supports community interaction
- X (Twitter) promotes short and instant updates
- YouTube focuses on video content

Scheduling is equally important because it ensures timely posting, audience consistency, and better campaign management. Tools such as Meta Business Suite, Buffer, and Canva help automate the publishing process and maintain a structured content flow.

A well-planned multi-platform campaign helps improve brand visibility, engagement, and audience retention.

Procedure

1. Select a brand or product for promotion.
2. Identify the target audience.
3. Choose suitable social media platforms.
4. Create separate content for each platform.
5. Write captions, hashtags, and CTAs.
6. Prepare a weekly or monthly content calendar.
7. Use a scheduling tool to schedule the posts.
8. Review the content alignment and publishing times.

Sample Content Plan

Platform	Content Type	Sample Post	Posting Time
Instagram	Image/Reel	Product launch creative	7:00 PM
Facebook	Poster + Caption	Offer announcement	6:00 PM
LinkedIn	Informative post	Professional brand update	9:00 AM
X (Twitter)	Short text post	Flash update	1:00 PM
YouTube	Short video	Product demo teaser	8:00 PM

Observation

Students observed that each platform requires different presentation styles and audience-oriented content. Scheduled posts improve consistency and help maintain campaign structure.

Result

Thus, platform-specific content was created and scheduled successfully for a multi-platform campaign.

Viva Voce Questions and Answers

1. What is content creation?

Answer:
Content creation is the process of developing digital material such as text, images, videos, and graphics for online communication.

2. Why is platform-specific content important?

Answer:
Because each platform has a different audience, format, and communication style.

3. What is a content calendar?

Answer:
A content calendar is a planned schedule of social media posts organized by date, time, and platform.

4. Name any two content scheduling tools.

Answer:
Meta Business Suite and Buffer.

5. What is the role of hashtags?

Answer:
Hashtags improve discoverability and help categorize content.

6. What is a CTA?

Answer:
CTA stands for Call-to-Action, which encourages users to take a specific action.

7. Which platform is best for professional communication?

Answer:
LinkedIn.

8. Why is scheduling useful?

Answer:
Scheduling saves time, ensures consistency, and improves campaign management.

9. What type of content performs well on Instagram?

Answer:
Visual content such as images, reels, and stories.

10. What is the main purpose of multi-platform campaigns?

Answer:
To reach a broader audience and improve brand visibility.

EXPERIMENT – 2

A/B Testing for Social Media Advertisements

Aim

To compare two versions of a social media advertisement and identify the more effective one using A/B testing.

Objective

- To understand the concept of A/B testing
- To create two ad variations
- To compare ad performance
- To select the better-performing ad

Tools Required

- Meta Ads Manager
- Canva
- Google Forms / Sheets
- Social media advertising dashboard

Theory

A/B testing, also called split testing, is a method used to compare two versions of a digital advertisement to determine which one performs better.

In social media advertising, even a small change in:

- Headline
- Image
- CTA
- Caption
- Color
- Offer wording

can significantly impact audience response.

For accurate results, only one variable should be changed at a time. This helps marketers identify what specifically influenced the performance.

A/B testing reduces guesswork and allows marketers to make decisions based on actual data and user behavior.

Procedure

1. Choose a product or service to advertise.
2. Create **Ad Version A** and **Ad Version B**.
3. Change only one element between the two ads.
4. Publish or simulate both ads.
5. Measure responses such as:
    - Clicks
    - Likes
    - Shares
    - Engagement
6. Compare results.
7. Identify the better-performing advertisement.

Sample Comparison

Element	**Ad A**	**Ad B**
Headline	Shop Now and Save 20%	Limited Offer – Buy Today
CTA	Shop Now	Learn More
Image	Product close-up	Lifestyle image

Observation

Students observed that slight variations in wording and design can affect ad performance significantly.

Result

Thus, A/B testing was performed successfully and the better-performing ad version was identified.

Viva Voce Questions and Answers

1. What is A/B testing?

Answer:
A/B testing is a method of comparing two versions of content or ads to determine which performs better.

2. Why is A/B testing used?

Answer:
It is used to improve marketing performance and reduce assumptions.

3. What should be changed in A/B testing?

Answer:
Only one element should be changed at a time.

4. What are examples of testable elements?

Answer:
Headline, image, CTA, caption, and color.

5. What is the purpose of testing CTA?

Answer:
To determine which action prompt attracts more user response.

6. What is ad engagement?

Answer:
Ad engagement refers to likes, comments, shares, clicks, and other interactions.

7. Why should only one variable be changed?

Answer:
To identify which specific factor caused the performance difference.

8. Which ad is considered successful?

Answer:
The ad that performs better based on selected metrics.

9. What is the benefit of split testing?

Answer:
It improves ad effectiveness and decision-making.

10. Is A/B testing useful in digital marketing?

Answer:
Yes, it is very useful for optimization and campaign improvement.

EXPERIMENT – 3

Analyzing Social Media Metrics Using Analytics Tools

Aim

To analyze the performance of social media campaigns using analytics tools and key performance metrics.

Objective

- To understand social media metrics
- To use analytics dashboards
- To evaluate content performance
- To interpret campaign results

Tools Required

- Instagram Insights
- Facebook Insights
- LinkedIn Analytics
- YouTube Studio
- Google Analytics
- Excel / Google Sheets

Theory

Social media analytics is the process of collecting, measuring, and interpreting data from social media platforms to understand campaign performance.

Important metrics include:

- Reach
- Impressions
- Likes
- Comments
- Shares
- Saves
- CTR (Click-through Rate)
- Engagement Rate

- Follower Growth
- Conversion Rate

Analytics tools help marketers understand:

- Which posts perform best
- What type of content the audience prefers
- When the audience is most active
- Which campaign objectives are being achieved

This analysis supports better planning and more effective future campaigns.

Procedure

1. Open the analytics dashboard of a selected platform.
2. Choose a campaign or post to analyze.
3. Record key performance indicators (KPIs).
4. Compare engagement and reach values.
5. Interpret audience behavior.
6. Identify strong and weak content.
7. Prepare a brief analysis report.

Sample Metrics Table

Metric	Value
Reach	2,500
Impressions	4,200
Likes	350
Comments	48
Shares	25
CTR	4.5%
Follower Growth	+120

Observation

Students observed that analytics provide measurable evidence of campaign success and help improve content strategy.

Result

Thus, the social media metrics were analyzed successfully using analytics tools.

Viva Voce Questions and Answers

1. What are social media metrics?

Answer:
They are measurable indicators used to evaluate social media performance.

2. What is reach?

Answer:
Reach is the number of unique users who see the content.

3. What are impressions?

Answer:
Impressions refer to the total number of times content is displayed.

4. What is engagement?

Answer:
Engagement includes likes, comments, shares, clicks, and other interactions.

5. What is CTR?

Answer:
CTR stands for Click-through Rate, showing the percentage of users who clicked the content.

6. What is follower growth?

Answer:
It is the increase in followers over a certain period.

7. Why is analytics important?

Answer:
It helps measure success and improve future campaigns.

8. What is conversion?

Answer:
A conversion is a desired action such as purchase, signup, or form submission.

9. What is the benefit of campaign analysis?

Answer:
It supports strategic improvement and better marketing decisions.

EXPERIMENT – 4

Developing a Brand Presence on Emerging Social Media Platforms

Aim

To build and evaluate a brand's digital presence on emerging social media platforms.

Objective

- To identify emerging social platforms
- To create a brand profile
- To understand audience behavior on new platforms
- To develop a branding strategy

Tools Required

- Threads / Pinterest / Snapchat / Reddit / Discord
- Canva
- Brand style guide
- Mobile apps / browser platforms

Theory

Emerging social media platforms offer brands new opportunities to connect with modern audiences. These platforms often have less competition and more experimental formats compared to traditional platforms.

A brand presence includes:

- Profile identity
- Logo and visual consistency
- Bio and description
- Posting strategy
- Audience interaction
- Content relevance

Brands must understand the nature of each platform before entering it. For example:

- Pinterest is highly visual and discovery-based
- Reddit is discussion-oriented
- Discord supports community engagement

- Threads encourages conversational brand tone

This experiment helps students understand how brands can remain innovative and visible in evolving digital spaces.

Procedure

1. Select a brand or startup idea.
2. Choose one or two emerging platforms.
3. Create a brand profile with logo, bio, and branding elements.
4. Plan 3 to 5 platform-specific posts.
5. Identify audience behavior and engagement style.
6. Observe how the platform differs from mainstream platforms.
7. Prepare a short branding strategy note.

Observation

Students observed that each emerging platform has a unique audience culture, communication style, and branding opportunity.

Result

Thus, a brand presence was developed successfully on emerging social media platforms.

Viva Voce Questions and Answers

1. What is brand presence?

Answer:
Brand presence is the visibility and identity of a brand on digital platforms.

2. What are emerging social media platforms?

Answer:
They are newer or rapidly growing platforms gaining user attention.

3. Name any three emerging platforms.

Answer:
Threads, Pinterest, and Discord.

4. Why should brands use emerging platforms?

Answer:
To reach new audiences and stay digitally relevant.

5. What is brand identity?

Answer:
It is the unique image, personality, and appearance of a brand.

6. Why is consistency important in branding?

Answer:
It helps build recognition and trust.

7. What is a brand bio?

Answer:
A brand bio is a short profile description explaining the brand.

8. Why is audience understanding important?

Answer:
Because content must match audience interests and behavior.

9. What type of content works best on Pinterest?

Answer:
Visual and idea-based content works best.

10. What is the main purpose of this experiment?

Answer:
To understand how brands can establish themselves on new digital platforms.

EXPERIMENT – 5

Crafting and Managing Influencer Marketing Collaborations

Aim

To design and manage an influencer marketing collaboration for promoting a brand or product.

Objective

- To understand influencer marketing strategy
- To identify suitable influencers
- To plan collaboration content
- To evaluate campaign effectiveness

Tools Required

- Instagram / YouTube / LinkedIn
- Social Blade / Influencer databases
- Canva
- Google Sheets / Proposal format

Theory

Influencer marketing is a form of digital promotion where brands collaborate with content creators who have a loyal and engaged online following.

Influencers may be:

- Nano Influencers
- Micro Influencers
- Macro Influencers
- Celebrity Influencers

A successful influencer collaboration depends on:

- Audience relevance
- Trust and authenticity
- Engagement rate
- Brand fit
- Content quality

The collaboration may include:

- Product reviews
- Unboxing videos
- Reels
- Story mentions
- Sponsored posts
- Giveaways

This experiment helps students understand how brands use online personalities to build trust and increase market reach.

Procedure

1. Select a brand or product.
2. Identify a suitable influencer.
3. Study the influencer's audience and engagement.
4. Draft a collaboration proposal.
5. Plan the content type and posting schedule.
6. Estimate expected reach and engagement.
7. Prepare a campaign management report.

Observation

Students observed that influencer selection is crucial and should align with brand image and target audience.

Result

Thus, an influencer marketing collaboration plan was prepared and managed successfully.

Viva Voce Questions and Answers

1. What is influencer marketing?

Answer:
Influencer marketing is a strategy where brands collaborate with online creators to promote products or services.

2. Who is an influencer?

Answer:
An influencer is a person who has the ability to affect audience opinions or buying decisions.

3. What is brand fit?

Answer:
Brand fit means the influencer matches the values, style, and audience of the brand.

4. What is sponsored content?

Answer:
Sponsored content is paid promotional content created by an influencer for a brand.

5. Why is authenticity important?

Answer:
Because authentic promotion builds trust among audiences.

6. What is engagement rate?

Answer:
It is the level of audience interaction with an influencer's content.

7. Name the types of influencers.

Answer:
Nano, micro, macro, and celebrity influencers.

8. What is ROI in influencer marketing?

Answer:
ROI is Return on Investment, measuring the results of the collaboration.

9. How is campaign success measured?

Answer:
By reach, likes, comments, clicks, conversions, and audience response.

10. Why should brands choose influencers carefully?

Answer:
Because the right influencer improves trust, relevance, and campaign success.
