MINOR DEGREE

AGEM204 - SOCIAL MEDIA MARKETING

LAB MANUAL

NAME :

REG NO :

YEAR : II

SEMESTER : IV

VISION AND MISSION OF THE INSTITUTION

INSTITUTE VISION

- Jeppiaar Institute of Technology aspires to provide technical education in futuristic technologies with the perspective of innovative, industrial, and social applications for the betterment of humanity.

INSTITUTE MISSION

- To produce competent and disciplined high-quality professionals with the practical skills necessary to excel as innovative professionals and entrepreneurs for the benefit of society.
- To improve the quality of education through excellence in teaching and learning, research, leadership, and by promoting the principles of scientific analysis, and creative thinking.
- To provide excellent infrastructure, serene, and stimulating environment that is most conducive to learning.
- To strive for productive partnership between the Industry and the Institute for research and development in the emerging fields and creating opportunities for employability.
- To serve the global community by instilling ethics, values, and life skills among the students needed to enrich their lives.

DEPARTMENT VISION

- To provide inclusive growth by imparting professional education to achieve a center of excellence by developing innovative, industrial and social entrepreneurs, proactive leaders and Critical thinkers and managers through continuous learning towards business management and Research for the betterment of the humanity.

DEPARTMENT MISSION

M1: To develop competent, disciplined and high quality professionals by providing a value- based education and imparting necessary skills to excel in their profession and in entrepreneurship for the benefit of the society

M2: To improve managerial, leadership and entrepreneurial skills by involving in teaching- learning process and in research through scientific analysis and creative thinking.

M3: To provide integrated technology and management theories to augment worldwide business practices.

M4: To foster for Industry-Institute Interaction for Research and Development in the emerging fields and creating opportunities for employability and entrepreneurship

M5: To promote lifelong learning through exposure to the corporate world and by upholding ethical values and Social Responsibility to enrich the lives of mankind.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs) :

MBA programme curriculum is designed to prepare the post graduate students

I. To have a thorough understanding of the core aspects of the business.
II. To provide the learners with the management tools to identify, analyze and create business opportunities as well as solve business problems.
III. To prepare them to have a holistic approach towards management functions.
IV. To inspire and make them practice ethical standards in business.

PROGRAMME OUTCOMES (POs):

PO1: Business Knowledge:

An understanding of management skills in their areas of specialization in fields of Finance, Human Resources, Marketing, Production, Supply Chain and Logistics, Healthcare, Banking and Insurance enabling enriched global business impact

PO2 Critical Thinking and Problem Analysis:

Ability to Identify, Formulate and Analyze the contemporary issues in the business process by critical thinking to identify the best strategic alternatives.

PO3 Conduct investigations of complex Problems:

Conduct investigation using appropriate research design and analyze the qualitative and quantitative data by suitable research tools and techniques to solve the complex problem with detailed interpretation.

PO4 Strategic Decision Making and solutions:

Apply technology and Brain Storm the innovative ideas to enhance organizational efficiency and choose the optimal strategic decision for obtaining effective solutions

PO5 Modern tool usage:

Ability to utilize the advanced contemporary tools and techniques for predictive analysis and modeling of the complex business issues to sustain and flourish in the dynamic business environment.

PO6 Entrepreneurial Skills

Ability to business ideas, develop business plans, understand regulatory requirements, and locate sources of finance to start, manage and sustain new business ventures

PO7 Environment and sustainability:

Ability to understand the business environment and develop legal and ethical strategic plan that align

with societal and environmental context for the purpose of sustainable development in the business.

PO8 Professional Integrity:

Ability to address the social, legal, cultural diversity issues through ethical and value based.

PO 9 Team work:

Ability to function effectively on multi-disciplinary teams with extensive participation

PO 10 Communication:

Ability to communicate effectively and clearly, to comprehend, write, prepare and make effective presentations.

PO11 Global Business Opportunities:

Ability to demonstrate the management principles and understand the diverse opportunities in the management functions and apply those as an Entrepreneur, Projects, field Work, Consultancy, and work in the Multidisciplinary business environment.

PO12 Life-long learning:

Ability to empathize the impact of changing management concepts and thoughts on society and create awareness of contemporary issues through independent and lifelong learning.

PROGRAMME SEPCIC OBJECTIVES (PSO):

PSO 1: To have a thorough understanding of the core aspects of the business.

PSO 2: To provide the learners with the management tools to identify, analyze and create business opportunities as well as solve business problems.

PSO 3: To prepare them to have a holistic approach towards management functions.

AGEM204 – SOCIAL MEDIA MARKETING LABORATORY

Social Media Marketing Laboratory							
Programme & Branch	**BE/B.TECH – CSE, IT, AIDS & ECE**	**Sem.**	**Category**	**L**	**T**	**P**	**Credit**
Prerequisites		**4**	**Minor**	**2**	**0**	**1**	**1**

Practical Experiments

Content creation and scheduling for multi-platform campaigns

A/ B testing for social media advertisements

Analyzing social media metrics using analytics tool

Developing a brand presence on emerging social media paltforms

Crafting and managing influencer marketing collaborations

Total: 30 periods

COURSE OUTCOMES: By the end of this course, learners will be able to:		**Bloom's Taxonomy Level**
CO1	Understand Social Media Marketing.	K1
CO2	Understanding the values of Facebook for Business.	K2
CO3	Design and build the LinkedIn presence.	K2
CO4	Integrate-Basics, Building a content strategy, Twitter usage.	K1
CO5	Understand the growing impact of influencer marketing on brand promotion.	K2

Exp. No.	Date	Experiment title	Page no.	Marks	Signature
1		Content creation and scheduling for multi-platform campaigns			
2		A/ B testing for social media advertisements			
3		Analyzing social media metrics using analytics tool			
4		Developing a brand presence on emerging social media paltforms			
5		Crafting and managing influencer marketing collaborations			

EXPERIMENT 1: CONTENT CREATION AND SCHEDULING FOR MULTI-PLATFORM CAMPAIGNS

EXERCISE 1 EXECUTIVE OVERVIEW

Objective

Create, batch-produce, and schedule 7–14 days of consistent, platform-optimized content across 2–3 channels without manual daily posting. By the end of this experiment, you will have built a repeatable work ow that reduces daily content creation stress and ensures maximum consistency across platforms.[1]

Why This Experiment Matters

The Problem: Most marketers post reactively. They wake up, scramble to nd something to post, create on-the- y, and wonder why consistency su ers. This creates:

- Inconsistent messaging across platforms
- Last-minute stress and poor-quality content •

Missed optimal posting times

- No time for strategic thinking or optimization **The**

Solution: Batch creation and scheduled posting.

Research shows that batch-created content outperforms ad-hoc content by 40–60% in terms of engagement because it's:

- More intentional (planned with strategy, not desperation) •

Better quality (you have time to craft, not rush)

- Optimized per platform (adapted to native formats, not copy-pasted)
  - Consistent in tone and messaging (created in one mindset, not scattered across weeks)

Expected Outcomes After This Experiment:

Metric	Before	After
Time spent on daily posting	**30–45 min/day × 7 = 3.5–5 hours**	**2–3 hours total per week**
Content consistency	**Unpredictable**	**7–14 days locked in**
Posting at optimal times	**40% of posts**	**90%+ of posts**
Content quality	**Rushed, varies**	**Intentional, consistent**
Platform-speci c adaptation	**Minimal**	**Full optimization**

What You'll Build

By the end of Phase 4, you will have:

1. **A 7–14 day content calendar** (Google Sheet or Notion template) with platform, format, hook, CTA, and posting time documented
2. **10–14 pieces of platform-optimized content** (mix of images, videos, carousels, text posts) ready to publish
3. **A scheduled queue** in your tool of choice (Bu er, Hootsuite, Meta Business Suite) with all posts locked in
4. **A weekly review process** to identify top-performing content and adjust next week's calendar
5. **A repeatable work ow** you can use every week (batching every Sunday, scheduling Monday, reviewing the following Sunday)

Key Metrics You'll Track

- **Impressions**: Number of times content appeared on screen **Reach**:
- Unique people who saw content
- **Engagement Rate**: (Likes + Comments + Shares + Saves) / Impressions
- **Click-Through Rate**: Clicks on links / Impressions
- **Follower growth**: New followers this week vs. last week

EXERCISE 2 STRATEGY & FOUNDATION

DEFINE YOUR CAMPAIGN GOAL

Every successful content calendar starts with clarity on your north star. Without this, your content becomes scattered some posts drive brand awareness, others sell, others engaged.
Choose ONE clear, measurable objective for the next 30 days:

Option 1: Growth Goal

- "Increase followers from 5,000 to 5,750 (15% growth in 30 days)" •

Metric to track: Follower growth rate

- Content strategy: More top-of-funnel awareness and value

Option 2: Engagement Goal

- "Increase average engagement rate from 2.5% to 4% (60% lift)" •

Metric to track: Engagement rate per post

- Content strategy: More community-focused, question-based, trending topics **Option 3:**

Conversion Goal

- "Generate 50 qualified leads from social (link clicks to landing page)" •

Metric to track: Clicks, signups, demo requests

- Content strategy: More promotional/CTA-heavy with clear value prop **Option**

4: Authority Goal

- "Establish thought leadership (increase saves/shares vs. likes)"

Metric to track: Save-to-like ratio, share rate, comments

- Content strategy: Educational, high-value, expert-positioning content

Option 5: Event/Launch Goal

- "Drive 500 registrations to [event] by [date]"
- Metric to track: Event page trap c, registrations
- Content strategy: Countdown posts, FOMO, social proof, testimonials

DEFINE YOUR GOAL

Fill in this template:

"Over the next 30 days, our social media goal is to [SPECIFIC METRIC] from [CURRENT STATE] to [DESIRED STATE] measured by [KPI]. This supports our larger business objective of [BUSINESS GOAL]."

Example:

"Over the next 30 days, our social media goal is to increase Instagram follower count from 8,000 to 9,200 (15% growth) measured by follower growth rate week-over-week. This supports our larger business objective of building a community of customers for our new SaaS product launch."

Your goal:

SELECT YOUR PLATFORMS (2–3 MAXIMUM)

Trying to maintain presence on 5+ platforms dilutes your e ort and quality su ers. Instead, dominate 2–3 platforms where your audience actually is.

Platform Decision Matrix:

Plat form	**Best Use Case**	**Your Audience?**	**Your Format?**	**Competing Activity?**	**Pick?**
Instagram	Visual content, younger demos, lifestyle/product	Yes/No	Reels/Stories/ Carousel	High/Me dium/Low	[ ]
Tik ok	Short-form video, Gen Z & millennials, trends	Yes/No	15–60 sec video	High/Me dium/Low	[ ]
LinkedIn	B2B, thought leadership, professionals	Yes/No	Long- form text, carousel	High/Me dium/Low	[ ]
YouTube	Authority, long- form, tutorials, SEO	Yes/No	10–20 min video	High/Me dium/Low	[ ]
Facebook	Community, older demographics, groups	Yes/No	Mix of formats	High/Me dium/Low	[ ]
Twitter/X	News, real-time, tech communities	Yes/No	Short text, memes	High/Me dium/Low	[ ]
Pinterest	Inspiration, DIY, non-salesy, long shelf-life	Yes/No	Pins (vertical images)	High/Me dium/Low	[ ]

Selection Criteria:

1. **Where is your audience?** (Use audience research, surveys, or competitor analysis)
2. **What content format are you comfortable creating?** (Video, text, design, mix?)
3. **Where are competitors active?** (Sanity check—if no competitors, why not? Is the audience there?)
4. **What's your capacity?** (2 platforms = 5–8 hours/week, 3 platforms = 8–12 hours/week)

Recommendation: If unsure, pick:

- **Instagram** (reaches most demographics, Reels algorithm is strong) **LinkedIn** (if B2B) or **TikTok** (if B2C, younger audience)

SELECT YOUR PLATFORMS (5 MINUTES)

List your top 2–3 platforms and why you chose them:

Platform 1: _____

Why: _____

Platform 2: _____

Why: _____

Platform 3 (optional): _____

Why: _____

EXERCISE: 3 DEFINE CONTENT PILLARS (THE FRAMEWORK FOR VARIETY WITHOUT CHAOS)

Content pillars are recurring themes/categories that structure your content without making it repetitive. They ensure every post serves a purpose and collectively tell a complete story about your brand.

Why content pillars matter:

- Without them, you create random posts and wonder why nothing sticks • With them, every post ts into a strategic narrative
- They help you maintain balance (not all sales, not all u)
- They make content ideation 10x faster ("What pillar should this week focus on?") **The 5**

Core Pillars (Pick 3–5):

Pillar 1: Education & Value

- What does your audience want to learn?
- Format: Tips, how-to, tutorials, frameworks, best practices •

Goal: Position you as expert, provide value

- Frequency: 40–50% of posts •

Examples:

- "5 mistakes in your email template (and how to x them)" ∘ "The complete guide to choosing a CMS"
- "React hooks explained in 5 minutes"

Pillar 2: Proof & Social Proof

- What results have you or your customers achieved?
- Format: Testimonials, case studies, before/after, metrics, wins •

Goal: Build credibility and trust

- Frequency: 20–30% of posts •

Examples:

- "One of our customers increased revenue 40% in 6 months" ∘ "Here's what happened when we changed our sales process" ∘ Customer testimonial screenshot with permission

Pillar 3: Behind-the-Scenes & Authenticity

- What's your team/process/culture like?
- Format: BTS photos/videos, day-in-the-life, outtakes, raw moments

Goal: Build connection and relatability Frequency: 10–20% of posts

Examples:

- "Real talk: Here's what happens behind the scenes of a product launch" Team member spotlight
- Outtake or blooper from a video shoot Pillar

4: Inspiration & Trends

- What's trending or inspiring in your space?
- Format: Trending audio, relevant news, motivational, industry trends •

Goal: Stay current and relevant

- Frequency: 10–20% of posts •

Examples:

- Comment on industry news with your take ○

Trending audio on TikTok/Reels

- Motivational quote with your brand angle

Pillar 5: Community & Engagement

- How do you engage your audience directly?
- Format: Questions, polls, user-generated content, challenges, AMAs Goal:
- Build community and get feedback
- Frequency: 10–20% of posts
- Examples:
  - "Question for you: What's your biggest [problem]?"
  - Instagram poll sticker in Stories
  - "Tag someone who [related action]" ○

Reposting user content (with credit)

Define Your Content Pillars (10 minutes)

Choose 3–5 pillars for your brand and write down 2–3 special content ideas per pillar:

Pillar 1: _____

Idea A: _____

Idea B: _____

Idea C: _____

Pillar 2: _____

Idea A: _____

Idea B: _____

Idea C: _____

Pillar 3: _____

Idea A: _____

Idea B: _____

_ Idea C: _____

Pillar 4 (optional): _____

Idea A: _____

Idea B: _____

Pillar 5 (optional): _____

Idea A: _____

Idea B: _____

EXERCISE 4 CONTENT PLANNING

Create Your Content Calendar Template

Your content calendar is the single source of truth. It documents every post—what, when, where, why. Use Google Sheets, Asana, Notion, or a dedicated tool like Sked Social. The format matters less than consistency and accessibility.

Minimum columns your calendar must include:

Column	Purpose	Example
Date	When the post goes live	Nov 28, 2025
Platform	Which platform	Instagram
Time	Optimal posting time	6:00 PM
Format	Content type	Reel, Static, Carousel, Text Post, Story
Pillar	Content category	Education, Proof, BTS
Hook/Hea dline	First 3–5 words (the attention grab)	"Stop doing this..."
Body Copy	Main message (5–50 words depending on platform)	[Full caption]
CTA	Call-to-action	"Tap the link in bio", "Comment your answer", "Shop now"
Asset Link	Where the visual lives	Drive link or Canva link
Status	Draft / Ready / Scheduled / Posted / Analyzed	Ready
Performa nce Notes	Metrics after posting	ER: 5.2%, Reach: 2,400

Template Day Content Calendar

Date	Platform	Time	Format	Pillar	Hook	CTA	Asset	Status
Nov 28	Instagram	6:00 PM	Reel	Education	"Stop wasting time on..."	Link in bio	Drive e/reef l123	Ready
Nov 28	Linked In	8:00 AM	Post	Thought Leadership	"Here's what I learned..."	Com meant below	Drive e/pos t123	Ready
Nov 29	Tik Tok	7:00 PM	Video	Trend s	[Hook with trending audio]	Follow for more	Drive/ tiktok 12 3	Draft
Nov 29	Instagram	6:00 PM	Carousel	Proof	"We helped [client]..."	Tap to see full story	Canva /car ousel	Ready
Nov 30	Instagram	9:00 AM	Story	Comm unity	"Quick question...	Poll sticker	Phon	Draft

Identify Content Themes & Messaging for the Week

Before you start creating, plan the week's theme or core message. This creates coherence.

Example: Week of Nov 25 Theme: "Content Creation Myths"

- Monday: Myth—"You need 10 hours to plan content" (Education pillar)
Tuesday: Myth—"You need expensive gear" (Behind-the-scenes pillar)
- Wednesday: Myth—"Followers matter more than engagement" (Proof/data pillar)
Thursday: Myth—"You need to post every day" (Trends/best practices pillar)
- Friday: Myth—"One post can go viral without strategy" (Education pillar)

This creates a narrative arc. Followers who see all 5 posts get a complete education. Those who see 1–2 still get value. The repetition builds the message.

Batch Planning Worksheet

Use this worksheet to plan 7–14 days of posts at once: **Week 1 Theme: _____**

Post #	Date	Platform	Pillar	Topic/Hook	Format
1	Day 1				
2	Day 1				
3	Day 2				
4	Day 2				
5	Day 3				
6	Day 3				
7	Day 4				

EXERCISE: 5 BATCH CONTENT CREATION

THE BATCHING MINDSET

Batching is about creating multiple pieces of content in one focused session, leveraging momentum and consistency. Instead of creating 1 post per day (7 days = scattered e ort), you create 10–14 posts in 2–3 dedicated hours.

Why batching works:

Momentum: Your creative energy peaks once and you use it fully Consistency: Same mindset, same tone for all content

Speed: Learning curve solved once (not 7 times)

Efficiency: One lighting setup, one recording background, one editing session

Quality: You have time to iterate, not rush

Batching math:

- Professional video content: 15–30 min per nished piece Professional
- graphic design: 10–20 min per piece (with templates)
- Written captions: 5–10 min per piece (with thinking time)
- Total for 10 pieces: 3–5 hours

The Batching Session: Hour-by-Hour Schedule

Setup (30 minutes before you start)

- Clear a desk/table
- Gather all props, lighting, phone/camera
- Close email, Slack.
- Set a 2–3 hour timer
- Have water nearby

Writing

- Open your calendar
- For each post, write the hook and CTA
- Don't overthink. Write 7–10 captions. Speed > perfection.

You'll have 30 minutes to write 10 captions = 3 min per caption

Use these templates to speed up:

Education post template:

"[Problem statement that makes them stop scrolling]

Here's what most people get wrong:
• [Wrong approach 1]
• [Wrong approach 2]
• [Wrong approach 3]

What you should do instead:
• [Right approach 1]
• [Right approach 2]
• [Right approach 3]

[CTA]"

Proof post template:
"[Special result/metric]

Here's how we did it:
[3–5 bullet points on what changed]

Most people miss [key insight] which is why they get [different

result]. [CTA: Want the full breakdown?]"

Community post template: "[Relatable problem or question]

I'm curious—your honest answer below:
[Option A or Option B?]
[Question?]

[Fun note or CTA]"

For graphics:

Open Canva
- Create a brand kit (if you haven't already) Use 1 template per pillar type to keep it fast
- Customize 5–7 graphics (change colors, text, quotes)
- Export as PNG

For video content (if creating):
- Set up your background/lighting once
- Record 3–5 short video clips (15–45 seconds each) Use your phone—quality is ne if lighting is good No need to edit yet (you'll do this in Step 3)

For mixed media:
- Screenshot 2–3 testimonials, quotes, or data points
- Download 2–3 trending audio clips (for TikTok/Reels) Gather any user-generated content with permission

Final review & asset organization

- Review all captions (x typos, improve hooks)
- Organize all assets in one folder (Google Drive or Canva)
- Label clearly (Nov28_insta_reel_v1.mp4, etc.)
- Create a simple checklist: all captions ✓, all visuals ✓, all links ready ✓

CONTENT BATCHING CHECKLIST

Complete this during your batching session: **Writing**

Phase:

- 7–10 captions written (with hooks and CTAs)
- All captions 2–3 sentences max (scannable on mobile)
- Every caption has a clear CTA ("Link in bio", "Comment below", "Tap to see more")

Captions match pillar strategy (not all sales-y, good mix)

Visual Phase:

- 5–7 graphics designed or 5 video clips recorded
- All visuals on-brand (colors, fonts, logo placement)
- All visuals mobile-optimized (readable on small screens)

video clips properly lit (no blurry, no dark)

- All assets organized in one folder with clear naming **Review**

Phase:

- Proofread all captions for typos, grammar
- Cross-check captions match visuals (no misalignment)
- All links tested (they work before scheduling)
- All videos have sound (if applicable)
- All graphics have alt-text descriptions prepared (for accessibility)

Platform-Content Adaptation

The same concept can be adapted for each platform. Here's how to get 3x mileage from each batched piece:

Concept: "5 Mistakes in Content Strategy "Instagram Reel

- Hook: "Stop doing this in your content strategy"
- Format: 45-second video with screen recording + voiceover

Music: Trending audio

Adapted LinkedIn Post

- Format: Carousel (5–7 slides)
- Tone: More professional, less music-driven

Text: Longer captions, add data/research

- CTA: "Share in comments which mistake you're making"

Adapted :TikTok

- Format: Quick cuts, faster pacing, trending audio

Tone: Casual, conversational

- Length: 30 seconds
- CTA: "Follow for more business tips"

Adapted Newsletter/Email

- Format: Turn the concept into an email thread
Tone: Storytelling, longer form
- Add: Extra resources, link to full article
CTA: "Reply with your biggest challenge"

Batching Template Pack

Download or recreate these templates to speed up your batching:

Canva Brand Kit (Do This Once):

- Font: [Your brand font]
- Colors: [Primary], [Secondary], [Accent]
Logo: Uploaded
- Create 5 simple templates:
    - Quote card (1080×1350 for Insta)
    - Text overlay (1200×628 for FB)
    - Carousel slide (1080×1350)
    - Story template (1080×1920)
    - TikTok template (1080×1920)

Caption Templates (Save These):

- Education format (tips template)
- Proof format (result template)
- BTS format (story template)
- Question format (poll template)
- Promo format (limited time template)

Batching Experiment Log

Record your batching session to track improvement:

Batching Session #1 (Date_____)

- Duration _____hours
- Posts created: _____
- Time per post _____ min
- quality: Low Medium High
- Biggest challenge: _____
- Next time, I'll: _____

(Repeat for future sessions. Your time-per-post should decrease as you get faster.)

EXERCISE: 6 SCHEDULING & OPTIMIZATION

Choose Your Scheduling Tool

Comparison of popular tools:

Tool	Best For	Cost	Learning Curve	Platforms
Meta Business Suite	Facebook/Instagram only	Free	Easy	FB, IG
Buer	Starting out, small teams	$5–$100	Very easy	7+ platforms
Hootsuite	Agencies, teams	$739	Medium	35+platforms
Later	Instagram visual planning	$15–$125	Easy	IG, FB,Pinterest, TikTok
Sked Social	Instagram focus	$25–$99	Easy	IG, FB, TikTok
Agora Pulse	Mid-size teams, engagement	$99–$399	Medium	10+platforms

Recommendation for beginners (Budget < $20/month):

- Start with Meta Business Suite (free) if only posting to Facebook/Instagram
- Use Buer ($5/mo.) if posting to 2+ platforms

Recommendation for teams (Budget > $100/month):

- Hootsuite or Agora pulse for team collaboration and reporting

for this experiment, use Bu er or Meta Business Suite (free tier).

SET UP YOUR SCHEDULING TOOL

Step 1: Connect Your Accounts

- Log into Bu er (or your tool)
- Navigate to "Connected Accounts"

Authenticate each platform (Instagram, LinkedIn, TikTok, etc.

- Verify you have permissions to post

Step 2: Add Your Team (if applicable)

- Invite team members or collaborators
- Set permissions (can they post? Just view? Can they approve?)

Step 3: Set Up Noti cations

- Enable noted when posts go live (you want to engage immediately) Enable
- weekly performance summary (sent every Sunday)

Determine Optimal Posting Times

Each platform has different peak activity times. Posting when your audience is active increases visibility.

General platform patterns:

Platform	**Best Times (Typical)**	**Reasoning**
Instagram	6–9 PM weekdays	Evening when people wind down
LinkedIn	8–10 AM, 12 PM weekdays	Workday breaks
TikTok	6–10 PM evenings	Young audience after school/work
Facebook	1–3 PM, 7–9 PM	Lunch break and evening
Twitter/ X	8–10 AM, 5–6 PM	Commute times, breaks
YouTube	4–6 PM	After school/work

But your audience may di er. Check your platform analytics:

Instagram Insights:

- Go to your pro le → Insights → Total Followers •
See "Most Active Times" (day of week and hour)

LinkedIn Analytics:

- Go to your pro le → Analytics
  - See when followers are most active **YouTube**

Studio:

- Analytics → Reach tab → Viewer overlap
- See when your subscribers are online

SCHEDULING YOUR POSTS

In Buer:

1.3.1.1 Click "Create Post"
1.3.1.2 Select platform(s)
1.3.1.3 Paste caption from your content calendar
1.3.1.4 Upload visual (photo/video)
1.3.1.5 Click "Optimize" to see recommended best time, or set custom time
1.3.1.6 Click "Schedule" and select date/time
1.3.1.7 Post scheduled ✓

Repeat for all 7–14 posts.

Pro tip: Don't schedule too far in advance.

- Ideal: Schedule 3–7 days out
- Reason: Platforms deprioritize very old scheduled posts; also gives edibility if major news breaks
- Avoid: Scheduling 60 days out (algorithm treats it differently)

SCHEDULING CALENDAR TEMPLATE

Create a weekly schedule view (helpful to see all platforms at once): **Week of Nov 25 Schedule:**

Time	Monday	Tuesday	Wednesday	Thursday	Friday
8:00 AM	LI Post				
6:00 PM	IG Reel	IG Static	IG Carousel		IG Reel
7:00 PM	TK Video		TK Video		
9:00 PM					IG Story

(LI = LinkedIn, IG = Instagram, TK = TikTok)

WEEKLY ENGAGEMENT & OPTIMIZATION ROUTINE

Scheduling posts is step 1. Engaging with your audience is step 2 (and equally important).

- Open each platform
- Respond to comments on your posts
- Like/comment on 5–10 posts from creators in your niche
- Check DMs, respond to any questions

- Pull performance data for all posts from the week
- Create "weekly wins" doc (top 3 posts, why they won)
- Identify underperformers (what was missing?)
- Draft next week's content calendar with adjustments
- Schedule next week's batch

Weekly Review Template

Every wee this out to inform next week's calendar:

Week of _____ Review:

Top 3 Performing Posts:

1. Post: _____ | Platform: _____ | Format: _____ | ER:_____ % | Why it won: _____
2. Post: _____ | Platform: _____ | Format: _____ | ER:_____ % | Why it won: _____
3. Post: _____ | Platform: _____ | Format: _____ | ER:_____ % | Why it won: _____

Bottom 3 Performing Posts:

1. Post: _____ | Platform: _____ | Format: _____ | ER _____ % | What didn't work: _____
2. Post: _____ | Platform: _____ | Format: _____ | ER _____ % | What didn't work: _____
3. Post: _____ | Platform: _____ | Format: _____ | ER _____ % | What didn't work: _____

Key Learnings:

- Format winning most: _____
- Topic winning most: _____
- Pillar type winning most: _____
- Posting time observation: _____
- Platform performing best: _____

Adjustments for Next Week:

- Increase _____ (do 60% of posts)
- Keep_____ (maintain 20%)
- Cut _____(reduce to 20%)

EXERCISE 7: ANALYSIS & CONTINUOUS IMPROVEMENT

Track These KPIs Weekly

Set a weekly review day (recommend: Sunday evening or Monday morning). Collect these metrics for each platform:

For all posts:

- Impressions (total times shown) •
Reach (unique people)
- Engagement (likes, comments, shares, saves)
Engagement Rate = Engagement / Impressions

For posts with links:

- Clicks (if URL shortened, use bit.ly or to track) C T R
(click-through rate) = Clicks / Impressions

For follower-focused campaigns:

- Follower growth (new followers this week)
- Follower growth rate = (New followers / Total followers) × 100

Platform-Special Performance Insights

Instagram Insights Deep Dive:

Segment Your Data

To patterns, segment by:

By format type:

Format	Posts	Total Engagement	Avg ER	Winner?
Reel	3	385	5.2%	✓
Static image	2	110	2.1%	
Carousel	2	190	4.3%	

By pillar type:

Pillar	Posts	Total Engagement	Avg ER	Winner?
Education	3	310	4.8%	✓
Proof	2	140	3.1%	
BTS	2	145	3.2%	

By topic:

Topic	Post s	Total Engagement	Avg ER	Winner ?
Content strategy	2	240	6.1%	✓
Personal branding	2	160	4.0%	
Tools & tech	3	210	3.0%	

Decision Framework: Do More, Keep, Cut

Based on your weekly analysis, adjust next week's calendar: **DO**

MORE (60% of posts):

- What format is winning? (Reels over statics = do 60% Reels)
- What topic is winning? (Content strategy over product features = focus content strategy)
- What pillar is winning? (Education over promo = 60% education) **KEEP**

(20% of posts):

- Secondary winners and consistent performers

Variety (don't want to be too one-note) **CUT**

(20% of posts):

- Formats, topics, pillars consistently underperforming •

Time better spent elsewhere

Example Decision:

Last week:

- Reels: 5.2% ER
- Carousels: 4.3% ER
- Static: 2.1% ER

Decision: Next week, 60% Reels, 30% Carousels, 10% Static (instead of even 33/33/33 split)

Content Calendar Template (Google Sheets)

[Downloadable template with formulas for auto-calculating engagement rates]

Batching Session Planner

Batching Date: _____

Posts to Create This Session: 10 15 [ ] 20 [ ] Time

Available: _____

Captions to Write (list topics):

1. _____

2. _____

3.

Visuals to Create (list formats & descriptions):

1. Reel on: _____
2. Static on: _____

[etc.]

Assets Collected:

- Music/audio clips •
Stock photos
- User-generated content •
Testimonials
- Brand templates (Canva

Post-Session Review:

- Time spent _____hours
- Posts created: _____ Quality
- score: 1–10: _____
- Reusable elements for next week: _____

EXPERIMENT 2: A/B TESTING FOR SOCIAL MEDIA ADVERTISEMENTS

EXERCISE 1 EXECUTIVE OVERVIEW

Objective

Run a controlled test on a paid social ad to identify which single variable (creative image, headline copy, or call-to-action button) drives the best ROI, lowest cost-per-result, and highest conversion rate. This experiment teaches you how to systematically improve your ad performance and reduce customer acquisition cost.

Why A/B Testing Matters

The Cost of Guessing:
Without A/B testing, you're ying blind. You create an ad, spend $100, get some results, and have no idea why. Was it the image? The headline? The audience? The time of day?

The Power of Testing:
With A/B testing, you isolate ONE variable, test it against a control, and learn de nitively what your specia l audience responds to. Research shows A/B testing can reduce cost-per-acquisition by 20–50% simply by testing different creative or copy variables.[1][2]

The Compound :
Each test teaches you something. After 5–10 tests, you've built a playbook of what works for your audience. Your next campaign launches stronger because it's built on proven data, not assumptions.

Expected Outcomes

Metric	Base	After 1–2 Tests	After 5+ Tests
Cost per click	$1.20	$0.90 (25% reduction)	$0.60 (50% reduction)
Cost per conversion	$25	$18 (28% reduction)	$12 (52% reduction)
Click-through rate	2.0%	3.1% (55% lift)	4.5% (125% lift)
Con dence in ad strategy	Low	Medium	High

EXERCISE 2 TEST SETUP & PARAMETERS (DAY 1)

Define Your Ad Objective

Every ad has one goal. Choose one (don't try to do multiple):

Objective 1: Lead Generation

- What you want: Form, email signups, consultations booked Metric to
- optimize: Cost per lead, lead quality
- Example: "Sign up for our free email course"

- Platform: Facebook, LinkedIn, Google Forms

Budget: $20–$50 for initial test

Objective 2: Website Trace / Clicks

- What you want: Clicks to your website, landing page visits
- Metric to optimize: Cost per click (CPC), click-through rate (CTR)
- Example: "Read the full article on our blog"
- Platform: Facebook, Instagram, Google Budget: $15–$40 for initial test

Objective 3: Conversion / Sales

- What you want: Purchases, bookings, demo requests
- Metric to optimize: Cost per purchase, return on ad spend (ROAS)
- Example: "Buy now" or "Book your demo"
- Platform: Facebook, Instagram, Google, TikTok (with pixel tracking) Budget: $30–$100+ for initial test (needs higher volume)

Objective 4: Engagement

- What you want: Likes, comments, shares on the post itself
- Metric to optimize: Engagement rate, cost per engagement
- Example: "Like + comment if you agree"
- Platform: Facebook, Instagram, TikTok Budget: $10–$30 for initial test

- What you want: People watching your video
- Metric to optimize: Cost per view, watch time
- Example: YouTube ads or social video ads
- Platform: YouTube, Facebook, TikTok Budget: $15–$50 for initial test

Define Your Ad Objective

Choose 1 objective that aligns with your business goal:

"For this test, my ad objective is: Leads Sales Engagement Video

Views This objective supports my larger goal of "

Set Your Budget

For initial A/B testing (time running ads or testing new variables):

Recommended budget allocation:

- Total test budget: $20–$100 (depends on your industry)

Split evenly: Budget / 2 = per variant

Example:

- Total budget: $50
  - Variant A:

$25 Variant B: $25

Why: You need ~500 impressions per variant to get meaningful data. If your CPC is $1 and you want 500 impressions with ~2% CTR = ~10 clicks = ~$10 per variant minimum.

Budget ranges by objective:

- Lead generation: $20–$50 (cheaper per conversion) Tra
- c: $15–$40 (fast, lots of volume)
- Sales: $50–$200+ (slower, needs higher volume)
- Engagement: $10–$30 (very fast, cheap)

Choose ONE Variable to Test

THIS IS CRITICAL: Test only ONE variable at a time.

If you test creative + headline + CTA all at once, you won't know which variable caused the improvement. Isolate.

The Three Main Variables (Pick One): Variable

1: Creative (Image or Video)

- Version A: Product photo (clean, white background)
- Version B: Lifestyle photo (person using product, context)
- Keep identical: Headline, body copy, CTA, audience, placement, budget, bid strategy

Why test this? Different audiences respond to different creative. Some want clean product shots; others want to see the product "in action."

Variable 2: Headline / Main Message

- Version A: Bene t-driven: "Save 5 Hours Per Week"
- Version B: Problem-focused: "Tired of Wasting Time? Here's How"
- Keep identical: Creative, body copy, CTA, audience, everything else

Why test this? Headline is often the thing people read. Different angles resonate with different people.

Variable 3: Call-to-Action (CTA) Button / Text

- Version A: CTA: "Learn More"
- Version B: CTA: "Get Free Access"
- Keep identical: Creative, headline, body copy, audience, everything else

Why test this? CTA clarity and urgency directly click rates. "Get Free Access" often outperforms "Learn More"

EXERCISE 3 CREATE YOUR AD VARIANTS

Platform-Specia l Setup (Meta Ads Example)

For Facebook / Instagram ads (most common):

1. **Go to Ads Manager**
   - facebook.com/ads/manager
   - Or Meta Business Suite → Ads Manager
2. **Create a Campaign**
   - Click "Create"
   - Select campaign objective (Lead generation, Tra c, Conversions, Engagement, or Video Views)
   - Name campaign: "[Your Brand] - [Test Variable] Test - [Date]" ○ Example: "SaaS Co - Creative Test - Nov 2025"
3. Conjure Campaign Settings
   - Budget: $50 total (or your amount)
   - Schedule: Today through [14 days out]
   - Campaign budget optimization: ON (lets platform allocate budget smartly)
4. **Create Ad Set** (Audience + Placement)
   - Name: "[Your Brand] - [Audience Description] - Test"
   - Audience: De ne your target (age, location, interests)
   - Placement: Keep consistent (e.g., "Feed only, all devices" for both variants) ○ Budget: $25 per ad set (or 50% of total)
   - Bid strategy: Automatic (let Meta optimize)
5. **Create Ad Creative** (Variant A)
   - Duplicate the ad set for Variant B after Variant A is created ○ Upload creative (image or video)
   - Write headline
   - Write body copy
   - Add CTA button
   - Click "Save"
6. *Review and Launch*
   - Both ads go live simultaneously

Creating Ad Copy

Ad Structure (applies to most platforms):

Component	Length	Purpose
Headline	30–40 characters	Grab attention, convey bene t
Body/Description	125 characters (Meta)	Elaborate on bene t, add urgency
Primary Text	300 characters (Meta)	Story, credibility, context
CTA Button	2–5 words	Clear action (Learn More, Buy, Sign Up)

Table 1: Ad copy components

Headline formulas that work:

Formula	Example	Why It Works
"Save [X] [time/money]"	"Save 5 hours per week"	Clear bene t
"[X]% of [audience] use..."	"87% of marketers use this"	Social proof
"You're [doing wrong thing]"	"You're paying too much for software"	Problem-focused
"The [new/best] way to..."	"The easiest way to create a sales funnel"	Position as solution
"[Specia l result] in [timeframe]"	"Double your leads in 30 days"	Concrete outcome
"[Question] that matters"	"Ready to work less and earn more?"	Engagement angle

Body copy formula:

"Most [audience] try [old method], but [problem]. Here's what changed: [specia l] . [Social proof or specia l detail]. [CTA]."

Example:

"Most entrepreneurs waste 8+ hours a week on admin tasks. But with Acme CRM, you reclaim that time. Used by 10,000+ companies to close 40% more deals. Ready to try it risk-

free?"

Variant Setup Examples

Test #1: Creative Variation (Image)

Element	Variant A	Variant B
Headline	"Double Your Productivity"	"Double Your Productivity"
Body	"Our customers report..."	"Our customers report..."
CTA	"Learn More"	"Learn More"
Creative	**Product photo (white bg)**	**Lifestyle (person using product)**
Audience	Same	Same
Placement	Same	Same
Budget	$25	$25

Test #2: Headline Variation

Element	Variant A	Variant B
Headline	**"Master Social Media Strategy"**	**"Social Media Confusing You? Here's the Fix"**
Body	"Everything you need to..."	"Everything you need to..."
CTA	"Start Now"	"Start Now"
Creative	Same	Same
Audienc e	Same	Same
Placement	Same	Same
Budget	$25	$25

Test #3: CTA Variation

Element	Variant A	Variant B
Headline	"Our New App is Here"	"Our New App is Here"
Body	"Manage all your channels..."	"Manage all your channels..."
CTA	**"Learn More"**	**"Get Free Trial"**
Creative	Same	Same
Audience	Same	Same
Placemen t	Same	Same
Budget	$25	$25

Pre-Launch Checklist

Before you hit "Publish":

- Variant A and Variant B ready to go
- Only ONE variable between them
- Headlines are compelling and bene t-focused
- CTAs are clear and action-oriented
- Images are high-quality and mobile-optimized
- Links are tested (they work)
- Audience is well-defined(not too broad)
- Budget split is equal ($25 / $25 or $50 / $50)
- Campaign is set to launch immediately and run for minimum 3 days
- UTM parameters are added (if tracking to website)

EXERCISE 4 RUNNING THE TEST

Timeline & What to Expect

Day 1–2: Learning Phase

- Budget spend: Higher CPC/CPA than usual
- Why? Meta's algorithm is learning which audience to show to
- What to do: Don't panic. Don't pause or tweak settings. Let it run. •

Typical metrics: Lower CTR, higher cost

Day 3–5: Optimization Phase

- Budget spend: Normalizing
- Why? Algorithm has data, optimizing delivery
- What to do: Still avoid tweaking. Watch for outliers but don't act •

Typical metrics: CTR stabilizing, costs coming down slightly

Day 6–7: Full Data Phase

- Budget spend: Steady state
- Why? Algorithm con dent in performance
- What to do: Prepare to analyze and make decision
- Typical metrics: Can now compare fairly

Daily Monitoring (Without Tweaking)

Daily check

Log into Ads Manager, click on your campaign:

- Check spend (is it tracking evenly between variants?)
- Check results (CPC, CTR, conversion rate)
- Look for red
  - One variant has 0 results (ad disapproved? audience wrong?)
  - Spend massively imbalanced (95% to one variant, 5% to other = learning phase issue, wait 1 more day)

  - Unusually high CPC for both (audience too broad? bid too low? Normal, nothing to do)

When NOT to pause/change settings:

- "Variant B has fewer clicks" (it's day 2, too early) •

"CPC is high" (normal during learning phase)
"I'm not seeing many results" (need 500+ impressions per variant)

When TO pause (emergencies only):

- Ad disapproved (violates policy)
- Typo or error in link (not working)
- Budget running out faster than expected

Sample Test Data (3 Days In)

Metric	Variant A	Variant B	Difference
Impressions	1,240	1,180	Even ✓
Clicks	35	48	+37% to B
Click-Through Rate (CTR)	2.8%	4.1%	+46% to B ✓
Cost Per Click (CPC)	$1.43	$1.04	-27% cost for B ✓
Total Spend	$50	$50	Even ✓
Conversions	4	7	+75% to B
Cost Per Conversion	$12.50	$7.14	-43% cost for B ✓

After day 5, Variant B is clearly winning. But wait until day 7 for decision

EXERCISE 5 ANALYZE & DECIDE

Pull Complete Data

After 7 days, export your full results from Ads Manager:

Meta Ads Manager export:

1. Go to Campaigns tab
2. Click your campaign
3. Click "Ads" sub-tab
4. Select both ad variants

5. Right-click → Export → Download CSV

This gives you:

- Impressions per ad
- Clicks per ad
- CTR per ad
- Spend per ad
- Conversions per ad
- Cost per conversion per ad

Compare Key Metrics

Create a comparison sheet:

Metric	Variant A	Variant B	Winner
Impressions	1,850	1,920	Even
Clicks	52	78	B (+50%)
CTR	2.8%	4.1%	B
Total Spend	$50.00	$50.00	Even
CPC	$0.96	$0.64	B (-33%)
Conversions	6	11	B (+83%)
Cost Per Conversion	$8.33	$4.55	B (-45%)
ROAS (if tracking revenue)	2.5x	4.2x	B (+68%)

Table 2: Full 7-day test results

Statistical Significance Check

"Is this difference real or just random variation?"

Quick rule for small samples:

- If one variant is **25%+ better** AND has **50+ conversions/interactions**, it's likely real
- If one variant is **10–20% better** AND has **100+ interactions**, it's likely real
- If both have **< 50 interactions** = treat as directional,

Example:

- Variant A: 6 conversions, 2.8% CTR
- Variant B: 11 conversions, 4.1% CTR
- Difference: 83% more conversions, 46% better CTR
- Sample size: 11 conversions is decent for an initial test
- Verdict: Variant B is the clear winner

Document Your Findings

Create a simple test log to track learnings over time: **Test**

Log Entry #1

- Date: Nov 25–Dec 1, 2025
- Objective: Lead generation (email signups)
- Variable tested: Headline (benefit-driven vs problem-focused)
- Version A: "Master Social Media Strategy" | 2.8% CTR, $0.96 CPC, 6 conversions, $8.33 CPA
- Version B: "Social Media Confusing You?" | 4.1% CTR, $0.64 CPC, 11 conversions, $4.55 CPA
- Winner: Version B (problem-focused headline)
- Improvement: 46% better CTR, 45% lower CPA
- Key learning: Our audience responds better to problem-focused headlines than benefit statements
- Next test: Will test problem-focused benefit (combine both angles)

EXERCISE 6: SCALE THE WINNER

Pause the Loser

In Ads Manager:

1. Click on Variant A (the underperformer)
2. Click "Edit"
3. Set ad status to "Paused"
4. Click "Publish"

Variant A is now paused (no more spend, but data remains).

Increase Budget on Winner

Once Variant B is the only active ad:

1. Click on Variant B
2. Click "Edit"
3. Increase budget by 25–50% (if pro table)

Example:

- Original budget: $25

New budget: $30–$37.50 (25–50% increase)

When to increase budget:

- Your CPA is pro table (i.e., revenue per customer > CPA) •

ROAS is positive (you're making money)

You have a cold audience (still learning) or warm audience (proven to convert)

When to NOT increase budget:

- CPA is too high table
- You're seeing fatigue (CTR dropping as you reach more people) You
- want to test another variable

Set Campaign to Auto-Optimize

In Ads Manager settings:

- Turn ON "Campaign Budget Optimization" (CBO)
- This lets Meta automatically allocate budget to best performers Result:
- Better ROI over time

EXERCISE 7 NEXT TEST

Choose Your Next Variable

Now that you've locked in the winning headline, test a dif f e r e n t

variable: **If you tested creative**

- Next test: Headline variation

If you tested headline

- Next test: CTA variation (or creative variation)

If you tested CTA:

- Next test: Audience variation (narrow vs broad) or creative

Compound Learning

Each test builds on the last:

Test 1 (Creative):

- Winner: Lifestyle photo > product photo
  - Learning: Audience wants context, not just product

Test 2 (Headline):

- Winner: Problem-focused > bene t-focused
  - Learning: Audience resonates with feeling understood, not just bene ts **Test**

3 (CTA):

- Winner: "Get Free Trial" > "Learn More"
  - Learning: Audience prefers tangible next steps **After**

3–5 tests, you have a strong ad formula:

- Lifestyle image + problem-focused headline + "Get Free Trial" CTA = High-performing ad template

This becomes your baseline for future campaigns.

A/B TESTING ADVANCED TOPICS

Testing Beyond Creative, Headline, CTA

Once you've tested the "big three," you can test:

Audience variations:

- Narrow audience (special interests + behaviors) vs broad audience (core audience + lookalikes)

Placement variations:

- Feed only vs. Stories vs. In-stream video vs. Audience Network **Bid**

strategy variations:

- Lowest cost vs. Target CPA vs. Maximize conversions

Landing page variations:

- Call-heavy landing page vs. content-heavy landing page

Building a Test Calendar

Run one test per week for predictable learning:

Week	Test Variable	Hypothesis	Expected Winner
1	Creative	Lifestyle > product	Lifestyle +40%
2	Headline	Problem > bene t	Problem +30%
3	CTA	Specia l > vague	Specia l +25%
4	Audience	Narrow > broad	Narrow +15%
5	Placement	Feed > stories	Feed +10%

Test Documentation Template

Create a testing log to reference later: **A/B**

Test Log (Cumulative)

Test #	Dat e	Vari able	Variant A	Verint B	Winne r	% Improvement	CPA/ CPC
1	Nov 25	Creative	Product photo	Life style	B	+46% CTR	-45% CPA
2	Dec 2	Head line	Bene t	Proble m	B	+30% CTR	-28% CPA
3	Dec 9	CTA	Learn More	Get Aces	B	+22% CTR	-18% CPA

(Over time, you'll see cumulative improvements: after 5 tests, you might be at 50%+ lower CPA than your original ad.)

EXPERIMENT 3: ANALYZING SOCIAL

MEDIA METRICS USING ANALYTICS TOOLS

EXECUTIVE OVERVIEW

Objective

Collect weekly social media performance data, interpret what it means, and convert insights into weekly content adjustments. By the end of this experiment, you'll have a data- informed process that continuously improves your content based on audience response rather than guessing.

Why This Experiment Matters

Without analytics: You post content, hope it performs, and move on. You have no idea what's actually working.

With analytics: You see which content resonates, what formats your audience prefers, what topics engage them most, and which platforms drive results. This transforms your strategy from guessing to data-driven optimization.

The Numbers: Companies that analyze and act on social metrics see 40–60% higher engagement and reach in the following month compared to those who don't track data.[3]

EXERCISE 1 CHOOSE YOUR ANALYTICS TOOL (DAY 1)

Native vs. Third-Party Tools

Native Analytics (Free, Recommended for Starting Out) Every

platform provides analytics to business/creator accounts:

Platf orm	Tool	Access	Cost	Best For
Instagram	Insights	Business account required	Free	Post-level data, follower insights, stories
Linked In	Analytics	Free with pro le	Free	Post impressions, engagement, demographics
TikTok	Analytics	Creator Fund or 10k+ followers	Free	Video views, engagement, audience demographics
YouTube	Studio Analytics	Free with channel	Free	Watch time, viewer retention, tra c sources
Face book	Meta Business Suite	Business page required	Free	Post performance, page insights, audience
Twitter	Analytics	Verif i ed account (paid)	$8/ m on th	Tweet impressions, engagement, reach

Advantages:

- Free
- Accurate (direct from platform) •
Real-time (updated instantly)
- Platform-specif i c (shows algorithm insights)

Disadvantages:

- Can't compare across platforms easily
- Manual export required for tracking over time •
Limited segmentation options

When to use: Solo creator, small team, <3 platforms, tight budget

---

Third-Party Tools (Paid, for Advanced Analysis)

Tool	Cost	Platforms	Best For
Sprout Social	$89–$500/m o	10+ platforms	Agencies, teams, comprehensive reporting
Hootsu ite	$739+/ mo	35+ platforms	Large teams, multi- account management
Later	$15–$125/m o	Instagram, Facebook, Pinterest, TikTok	Visual planning, content calendar
Brand2 4	$99–$999/m o	All major platforms	Sentiment analysis, brand monitoring
Metric ool	€20–€100/m o	8+ platforms	Budget-friendly alternative, competitor analysis
Agorap ulse	$99–$399/m o	10+ platforms	Engagement management, team collaboration
SocialB ee	$99–$599/m o	8+ platforms	Content calendar, AI scheduling, analytics

Advantages:

- Cross-platform reporting (one dashboard) • Competitor benchmarking
- Advanced segmentation
- Scheduled reports (emailed to you) • Better visualizations

Disadvantages:

- Cost ($100–$500+ per month) • Learning curve
- Less real-time than native

When to use: Multiple platforms, team of 3+, advanced reporting needs, budget available

---

Decision: For This Experiment, Use Native Analytics

We'll start with native because:

- No cost
- Accurate
- All data you need to make optimization decisions •

Manual process teaches you what to look for

If managing 5+ accounts or team of 3+: Upgrade to Sprout Social or Hootsuite

---

EXERCISE 2 ACCESS & BASELINE YOUR ANALYTICS (DAYS 1–2)

Set Up Account Access

Instagram Business Account Setup:

1. Go to your Instagram pro le
2. Tap menu (three lines)
3. Settings > Account
4. Switch account type to "Business Account" (if not already)
5. Return to pro le, tap menu
6. Tap "Insights" (now visible)

LinkedIn Prof i le Setup:

1. Go to your LinkedIn pro le
2. Scroll to top, look for "Analytics" button (appears when you have 10+ followers)
3. Click "Analytics"

TikTok Creator Account Setup:

1. Go to pro le
2. Tap menu (three lines)
3. Settings > Creator fund or Creator Marketplace (depending on follower count)
4. Once eligible, go to "Analytics" in left menu

YouTube Studio Setup:

1. Go to studio.youtube.com
2. Log in with YouTube account
3. Left menu: Click "Analytics"

Screenshot Your Baseline (Week 1)

Before you start optimizing, capture your current state. This is your baseline to measure improvement against.

Instagram Insights baseline: Screenshot:•

Prof i le views (last 7 days)

- Followers gained (last 7 days)
- Top posts (last 7 days) - note engagement rate, reach
- Top Stories (if applicable)
- Audience demographics (age, location, gender)

Save these screenshots in a folder: Analytics Baseline / [Platform] / [Date]

LinkedIn Analytics baseline:

Screenshot:
Pro le views (last 7 days)
Search appearances
Post impressions (last 7 days)
Engagement (last 7 days)
Follower demographics

EXERCISE 3 KEY METRICS TO TRACK (ONGOING)

The 7 Essential Metrics (Pick 3–5 Based on Your Goal)

Metric 1: Reach

Def i nition: Unique people who saw your post
Why track: Shows how far your message travels
Platform: All platforms track this
Target: Should grow week-over-week (even small growth = good)
Benchmark: 20–50% of your followers per post is typical for organic content

Metric 2: Impressions

Definition: Total number of times your post appeared (some people may see it multiple times)
Why track: Shows total visibility
Platform: All platforms track this
Target: Should be 30–100% higher than reach (due to repeats)
Note: Reach is the more important metric

Metric 3: Engagement (Likes + Comments + Shares + Saves)

- Def i nition: Total interactions on a post
  Why track: Shows how much your content resonates
- Platform: All platforms track this
- Target: Grows with reach (proportional)
- Benchmark: 2–5% engagement rate for organic is typical (50 engagements on 2,000 impressions = 2.5% ER)

Metric 4: Engagement Rate

- Def i nition: Engagement / Impressions × 100

Formula: (Likes + Comments + Shares + Saves) / Impressions Example:
100 engagements / 2,000 impressions = 5%
Why track: Normalizes engagement across posts of di erent sizes
Target: 3–8% for small creators, 1–3% for larger accounts
Benchmark: Compare this week to last week (should trend up if content improves)

Metric 5: Click-Through Rate (CTR)

Def i nition: Clicks on your link / Impressions
Formula: Clicks / Impressions × 100
Example: 50 clicks / 2,000 impressions = 2.5%
Why track: If you're driving tra c to website, this shows
Target: 1–3% is typical; 5%+ is exceptional
Platforms: Instagram, LinkedIn, TikTok (via link in bio tracking)

Metric 6: Follower Growth Rate

Def i nition: (New followers this week / Total followers) × 100
Example: (150 new followers / 5,000 total) × 100 = 3%
Why track: Sustainable growth is 1–3% per week Target:
1–5% per week
Benchmark: Month-over-month growth should be 5–15%
Note: Growth naturally slows as you get larger (5% for 1,000 followers = 50 new; 5% for 100,000 = 5,000)

Metric 7: Saves / Shares

- De nition: People saving your post or sharing with others
- Why track: Indicates your content is valuable enough to keep
- Platform: Instagram, TikTok, LinkedIn track this
- Target: Saves should be 10–20% of total engagements for educational content
- Benchmark: High save rate indicates authority and value

Metric Selection: Choose Based on Your Goal

If goal = Grow followers:
Track: Reach, Follower growth rate, Engagement rate

If goal = Drive website tra c:
Track: CTR, Clicks, Tra c to website

If goal = Build authority:
Track: Engagement rate, Saves, Comments (quality of feedback)

If goal = Generate leads:
Track: CTR, Email signups, Form submissions

If goal = Build community:
Track: Engagement rate, Comments (volume and tone), Community feedback

---

EXERCISE 4 : WEEKLY DATA COLLECTION (ONGOING)

Create Your Weekly Tracking Sheet

Use Google Sheets to track weekly metrics. Create a simple template:

Column structure:

Week	Post #	Post Date	Platform	Format	Topic/Pillar	Reach	Impressions	Engagement	ER%	Saves	Comments
Nov 25	1	Nov 28	IG	Reel	Education	2,400	3,200	165	5.2%	42	18
Nov 25	2	Nov 28	IG	Static	Proof	800	950	28	3.0%	8	4
Nov 25	3	Nov 29	LI	Post	Thought Lead	1,200	1,450	82	5.7%	15	12

Add columns for your key metrics. Minimize columns you don't need.

Weekly Collection Routine

Every Sunday (30 minutes):

Step 1: Export data from each platform (10 min)

- Instagram: Insights > Last 7 days > Screenshot top posts
- LinkedIn: Analytics > Export if available, else manual entry
- TikTok: Analytics > Last 7 days > Screenshot
- YouTube: Analytics > Last 28 days > Screenshot

Step 2: Enter data into tracking sheet (15 min)

- Go through each platform's top posts
- Record: reach, impressions, engagement, ER, comments, saves

- Note: Format (Reel, static, carousel), topic, pillar

Step 3: Calculate highlights (5 min)

- Highlight row with highest engagement rate (green)
- Highlight row with lowest engagement rate (red)
- Note: Avg ER for the week

EXERCISE 5 : ANALYZE & SEGMENT YOUR DATA (WEEKLY)

3.1.2 The 3-Question Weekly Review

Every Sunday, after collecting data, answer these three questions: **Question**

1: What Worked? (Top 3 Posts)

Find your top 3 posts by engagement rate:

Po st	Form at	Topic	ER %	Why?
1	Reel	Content strategy tips	7.2 %	Trending audio + relatable pain point
2	Carou sel	Case study	6.8 %	Specif i c numbers, proof- based
3	Static	Quote + image	5.1 %	Inspirational, simple design

Note the patterns:

- Format: Which format(s) won? (Reels, carousels, static?) •
Topic: Which topics won? (Education, proof, BTS?)
- Pillar: Which pillar performed? (Which content category?) •
Time: What time did it post?
- Caption: Did certain hook types get more engagement?

Question 2: What Flopped? (Bottom 3 Posts) Find

your bottom 3 posts by engagement rate:

Post	Format	Topic	ER %	Why?
1	Static	Product promo	1.2 %	Too salesy, not enough value
2	Video	Behind-the- scenes	2.1 %	Low production quality, boring
3	Carousel	Industry news	2.5 %	Topic not audience- specific

Note the gaps:

- Format: Did certain formats underperform?
Topic: Were some topics ignored?
- Pillar: Was promotional content ignored?
Audience: Did this miss your audience?

Question 3: What Changed? (Week-over-Week Trends) Compare

this week to last week:

Metric	Last Week	This Week	Change	Interpretation
Average	3.8%	4.2%	+10%	Improving ✓
Reach	12,000	13,200	+10%	Growth ✓
Followers	5,000	5,080	+1.6%	Steady
CTR	2.1%	1.9%	-10%	Watch (or normal variation)

Trend interpretation:

- All metrics up = Strong week, content resonating
- Most up, some down = Normal variation, keep strategy
- Most down = Something changed (algorithm, audience, content quality?)

Segmentation: Find Patterns

Break your data down by category to find what's really winning:

Segment 1: By Format

Format	Posts	Total Reach	Avg ER	Top Post
Reel	3	8,200	5.8%	7.2%
Carousel	2	3,400	4.9%	6.8%
Static	2	1,800	2.8%	3.5%

Finding: Reels get 2x higher engagement than static posts **Decision:**
Increase Reels to 60% of content, static to 15%

Segment 2: By Topic

Topic	Posts	Avg Reach	Avg ER	Winner?
Content strategy	2	2,600	6.1%	✓
Personal branding	2	1,900	3.2%	
Tools & tech	2	1,400	2.1%	

Finding: Content strategy gets 3x higher engagement than tools/tech
Decision: Next week, 50% content strategy posts, 30% personal branding, 20% tools **Segment 3:**

By Pillar

Pillar	Posts	Avg ER	Wins?
Education	3	5.8%	✓
Proof	2	4.2%	
BTS	2	3.1%	

Finding: Educational content gets highest engagement **Decision:**
Increase education to 60% of posts, reduce BTS to 15%

EXERCISE 6 : CONVERT INSIGHTS INTO ACTIONS

The Action Planning Template

After your 3-question review and segmentation, create an action plan:

Weekly Action Plan Template

Week of: ____

Top insights from this week's data: 1.

2. _____

3. _____

Content format adjustment:

- Currently: Reels 40%, Carousel 30%, Static 30%
- Change to: Reels 60%, Carousel 25%, Static 15% •

Reason: Reels got 5.8% avg ER vs 2.8% for static

Content topic adjustment:

- Currently: Equal mix of topics
- Change to: 50% content strategy, 30% personal branding, 20% tools •

Reason: Content strategy posts got 3x higher engagement

Content pillar adjustment:

- Currently: Education 40%, Proof 30%, BTS 30%
- Change to: Education 60%, Proof 25%, BTS 15%
  - Reason: Educational posts showed strongest performance

Posting time adjustment (if applicable):

- Keep: 6 PM posts (working well)
  - Try: 9 AM posts (no data yet, experiment)

Next week's content calendar (rough):

- Mon 6 PM: Reel on [content strategy topic]
- Tue 6 PM: Carousel on [personal branding topic]
- Wed 6 PM: Reel on [content strategy topic]
- _____
- Thu 9 AM: [Educational post experiment]
  Fri 6 PM: Reel [proof/case
  study]Engagement Rate Tracker (Long-term)

Create a long-term tracker to see if your adjustments are working:

Week	Avg ER %	Reach	Followers	Top Format	Top Topic	Trend
Nov 18	3.2%	8,500	4,800	Carousel	General	Baseline
Nov 25	3.8%	9,200	4,920	Carousel	Strategy	+18%
Dec 2	4.2%	10,100	5,080	Reel	Strategy	+10%
Dec 9	4.5%	11,300	5,240	Reel	Strategy	+7%

Observation: By focusing on Reels and content strategy (weeks 2–4), ER improved from 3.2% to 4.5% (+40% lift). This is working.

ADVANCED ANALYTICS: COMPETITIVE BENCHMARKING

Compare Your Metrics Against Competitors

Pick 2–3 competitors in your space. Weekly, check their average engagement rate. **Competitive Benchmark Sheet:**

Account	Followers	Avg ER (est)	Format	Top Topic	Notes
You	5,000	4.5%	Reel	Strategy	Growing
Competitor A	25,000	2.1%	Mix	General	Established, lower ER
Competitor B	8,000	3.8%	Static	Trends	Smaller, lower ER than you

Insight: You're outperforming competitors A & B on ER. Your strategy is working well.

ANALYTICS TOOLS & WORKFLOWS

Monthly Analytics Review (Extended)

Every month (not just weekly), do a deeper dive:

Monthly Review Includes:

1. **Trend analysis:** Is ER trending up/down over 4 weeks?
2. **Seasonal patterns:** Did any holidays or events a ect metrics?
3. **Algorithm changes:** Did platform changes impact your reach?
4. **Audience growth:** Did follower growth accelerate?
5. **Content ROI:** If you have links/UTM, did social drive revenue?

Metrics Dashboard (Optional, Advanced)

If using Sprout Social or Hootsuite, create a custom dashboard:

Dashboard widgets to include:

- Weekly avg engagement rate
- Top post of the week
- Follower growth
- Platform comparison (which platform performs best?)
- Content format performance
- Topic performance
- Competitor comparison (if available in tool)

EXPERIMENT – 4
DEVELOPING A BRAND PRESENCE ON EMERGING SOCIAL MEDIA PLATFORMS

Aim
To develop a strategic brand presence on emerging social media platforms by identifying suitable platforms, creating platform-specific content, and evaluating audience engagement.

Objectives
The objectives of this experiment are:
1. To understand the concept of emerging social media platforms.
2. To identify suitable emerging platforms for a brand.
3. To create a platform-specific brand positioning strategy.
4. To develop and publish content tailored to the selected platform.
5. To analyze the effectiveness of the brand presence through engagement and growth metrics.

Tools Required
- Laptop / Desktop / Smartphone
- Internet Connection
- Canva / Adobe Express / Graphic Design Tool
- Social Media Accounts
- Google Sheets / Excel / Notion
- Brand Logo / Brand Identity Materials

Theory
Social media marketing is continuously evolving, with new platforms emerging based on changes in user behavior, content preferences, and digital communication styles. While traditional platforms such as Facebook, Instagram, and LinkedIn remain dominant, newer and emerging platforms create unique opportunities for brands to establish early visibility and connect with highly engaged niche communities.
Emerging social media platforms may include text-based discussion spaces, visual storytelling platforms, community-based networks, creator-driven apps, or private audience channels. These platforms are valuable because they often offer lower competition, stronger organic reach, and more authentic user engagement compared to saturated mainstream channels.
A brand presence on an emerging platform is not simply created by opening an account. It requires strategic planning, audience understanding, platform-specific adaptation, and consistent communication. A successful brand presence should reflect the brand's identity while also fitting naturally into the culture of the selected platform.
In this experiment, students will analyze one or more emerging social media platforms, determine whether they are suitable for a chosen brand, create a launch strategy, design content, and measure the performance of the initial brand presence.

Platform Concepts Covered
This experiment covers the following concepts:
- Emerging social media platforms
- Brand identity and digital positioning

- Platform-specific content adaptation
- Audience behavior analysis
- Community building
- Engagement tracking
- Brand growth strategy

Procedure

Step 1: Select a Brand

Choose a real or hypothetical brand for the experiment.

Examples:

- Educational Institute
- Fashion Brand
- Startup Business
- Food Brand
- Personal Brand
- Digital Marketing Agency

Selected Brand Name: _____

Step 2: Identify Emerging Platforms

List at least 3 emerging or less-saturated social media platforms suitable for the chosen brand.

Examples:

- Threads
- Discord
- Telegram
- Reddit
- Lemon8
- Pinterest niche boards
- Twitch

Platform Identification Table

S. No	Platform Name	Type of Platform	Why It Is Emerging
1	_____	_____	_____
2	_____	_____	_____
3	_____	_____	_____

Step 3: Evaluate Platform Suitability

Evaluate the platforms based on audience fit, content type, and brand compatibility.

Platform Evaluation Matrix

Criteria	Platform 1	Platform 2	Platform 3
Audience Match	____	____	____
Content Compatibility	____	____	____
Ease of Use	____	____	____
Brand Fit	____	____	____
Growth Potential	____	____	____
Final Rating	____	____	____

Selected Platform for Experiment: _____

Step 4: Define the Brand Objective
State the purpose of creating a presence on the selected platform.
Objective Statement
"Our brand aims to establish a presence on _____
to _____
for the target audience _____."

Step 5: Create Brand Profile Strategy
Prepare the brand identity elements for the selected platform.
Profile Setup Checklist

Profile Element	Status (✓ / ✗)
Username finalized	____
Profile picture/logo uploaded	____
Bio written	____
Website / Link added	____
Brand description included	____
Introductory post planned	____

Step 6: Write the Brand Bio
Draft a suitable platform-specific brand bio.
Brand Bio Draft

Step 7: Define Content Pillars
Select 3 to 5 content pillars for the selected platform.
Suggested Content Pillars

- Educational Content
- Awareness Content
- Community Engagement
- Social Proof
- Behind-the-Scenes
- Brand Personality

Content Pillar Table

Pillar	Description	Example Topic
1	_____	_____
2	_____	_____
3	_____	_____
4	_____	_____
5	_____	_____

Step 8: Prepare a 7-Day Content Plan
Create a 7-day content launch schedule for the selected platform.
7-Day Content Calendar

Day	Topic	Content Type	Format	CTA
Day 1	_____	_____	_____	_____
Day 2	_____	_____	_____	_____
Day 3	_____	_____	_____	_____
Day 4	_____	_____	_____	_____
Day 5	_____	_____	_____	_____
Day 6	_____	_____	_____	_____
Day 7	_____	_____	_____	_____

Step 9: Create Sample Posts
Students should create or simulate at least 5 posts for the selected platform.
Post Creation Record

Post No.	Topic	Format	Purpose	Status
1	_____	_____	_____	_____
2	_____	_____	_____	_____
3	_____	_____	_____	_____
4	_____	_____	_____	_____
5	_____	_____	_____	_____

Step 10: Community Engagement Activities
Perform or simulate engagement activities for the selected platform.
Engagement Activity Tracker

Activity	Done (Yes/No)	Observation
Replied to comments	____	_____
Asked audience questions	____	_____
Shared relevant discussion	____	_____
Interacted with similar creators	____	_____
Encouraged audience participation	____	_____

Step 11: Track Performance Metrics
Observe the performance of the posts over a fixed period.
Performance Observation Table

Metric	Week 1	Week 2	Observation
Followers	____	____	_____
Reach	____	____	_____
Engagement	____	____	_____
Comments	____	____	_____
Shares / Saves	____	____	_____

Metric	Week 1	Week 2	Observation
Profile Visits	____	____	_____

Observation

During the experiment, students should observe:

- Which content type receives better engagement
- Which platform behavior differs from mainstream platforms
- Whether the selected platform suits the brand identity
- How community-driven communication affects brand visibility

Student Observation Notes

Result

A structured brand presence was successfully developed on an emerging social media platform by creating a platform-specific profile, content strategy, and engagement plan.

EXPERIMENT – 5
CRAFTING AND MANAGING INFLUENCER MARKETING COLLABORATIONS

Aim
To identify suitable influencers and design a structured influencer marketing collaboration for a brand, including outreach, planning, execution, and performance evaluation.

Objectives
The objectives of this experiment are:
1. To understand the concept of influencer marketing.
2. To identify different categories of influencers.
3. To evaluate influencer-brand fit.
4. To prepare an influencer collaboration strategy.
5. To draft outreach communication and campaign deliverables.
6. To measure the performance and outcomes of influencer collaborations.

Tools Required
- Laptop / Smartphone
- Internet Connection
- Social Media Platforms
- Google Sheets / Excel
- Canva / Presentation Tools
- Email / Messaging Platform
- Brand Details / Product Information

Theory
Influencer marketing is one of the most effective modern promotional strategies used by brands to connect with audiences through trusted creators. Instead of relying only on direct advertisements, brands collaborate with individuals who have influence over a particular audience segment. These influencers may be content creators, experts, reviewers, community leaders, or social personalities.
Influencer marketing works because audiences often perceive creator recommendations as more authentic and relatable than conventional advertising. A well-planned influencer campaign can help a brand increase awareness, build trust, improve engagement, and even drive conversions.
However, successful influencer marketing requires more than simply selecting someone with a high follower count. It involves evaluating the relevance of the influencer's audience, the quality of their content, their engagement level, and how naturally they align with the brand.
This experiment gives students practical exposure to the complete influencer collaboration process—from identifying suitable creators to drafting outreach, planning campaign deliverables, and evaluating campaign results.

Concepts Covered
This experiment covers the following concepts:
- Influencer marketing strategy

- Nano, Micro, Macro, and Mega influencers
- Influencer-brand fit analysis
- Collaboration planning
- Outreach communication
- Campaign execution
- Performance and ROI evaluation

Procedure

Step 1: Select a Brand

Choose a real or hypothetical brand for the collaboration.

Selected Brand Name: _____

Brand Category: _____

Examples:

- Fashion / Clothing
- Beauty / Personal Care
- Educational Service
- Startup / App
- Food / Café
- Digital Product
- Event Promotion

Step 2: Define Campaign Objective

State the purpose of the influencer campaign.

Possible Objectives

- Brand Awareness
- Product Launch
- Lead Generation
- Website Traffic
- Event Promotion
- Community Growth
- Sales Conversion

Campaign Objective Statement

"This influencer campaign is designed to _____
for the brand _____
by reaching the target audience _____."

Step 3: Identify Potential Influencers

Research and identify at least 5 influencers suitable for the brand.

Influencer Identification Table

S. No	Influencer Name	Platform	Niche	Followers
1	_____	_____	_____	_____
2	_____	_____	_____	_____
3	_____	_____	_____	_____
4	_____	_____	_____	_____
5	_____	_____	_____	_____

Step 4: Categorize Influencers

Classify the shortlisted influencers according to their follower size.
Influencer Categories

- Nano Influencer: 1,000 – 10,000 followers
- Micro Influencer: 10,000 – 100,000 followers
- Macro Influencer: 100,000 – 1 million followers
- Mega Influencer: Above 1 million followers

Influencer Category Table

Influencer Name	Followers	Category
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Step 5: Evaluate Influencer-Brand Fit
Analyze each influencer based on audience relevance, engagement, content quality, and brand compatibility.
Influencer Evaluation Matrix

Criteria	Influencer A	Influencer B	Influencer C
Audience Match	____	____	____
Engagement Quality	____	____	____
Content Style	____	____	____
Brand Fit	____	____	____
Authenticity	____	____	____
Professionalism	____	____	____
Final Score	____	____	____

Selected Influencer for Campaign: _____

Step 6: Define Collaboration Type
Choose the type of influencer collaboration.
Possible Collaboration Formats

- Sponsored Post
- Story Promotion
- Reel / Video Collaboration
- Product Review
- Giveaway
- Event Promotion
- Affiliate Collaboration
- Brand Ambassador Program

Selected Collaboration Type

Step 7: Prepare Collaboration Deliverables
Define what the influencer is expected to deliver.
Deliverables Planning Table

Deliverable	Quantity	Purpose	Deadline
Reel / Video	____	_____	_____
Story / Story Frames	____	_____	_____
Feed Post	____	_____	_____
Mention / Review	____	_____	_____

Step 8: Prepare the Influencer Brief
Draft the campaign brief that would be shared with the influencer.
Influencer Brief Format
Brand Name: _____
Campaign Name: _____
Campaign Objective: _____
Target Audience: _____
Key Message: _____
Deliverables: _____
Tone / Style: _____
Mandatory Tags / Hashtags: _____
Timeline: _____
Approval Process: _____

Step 9: Draft Outreach Communication
Write a professional influencer outreach message.
Sample Outreach Draft

Step 10: Record Collaboration Progress
Track the communication and progress of the collaboration.
Collaboration Tracking Sheet

Activity	Status
Influencer shortlisted	____
Outreach sent	____
Response received	____
Collaboration confirmed	____
Deliverables finalized	____
Brief shared	____
Content approved	____
Campaign launched	____

Step 11: Campaign Launch Monitoring
Observe the collaboration after the content is posted.
Launch Day Checklist

Item	Status (✓ / ✗)
Influencer posted content	____
Brand tagged correctly	____
CTA included	____

Item	Status (✓ / ✗)
Hashtags used	____
Story / post reshared by brand	____
Audience comments monitored	____

Step 12: Measure Campaign Performance
Track the campaign outcomes.
Performance Tracking Table

Metric	Value	Observation
Reach	____	_____
Impressions	____	_____
Likes	____	_____
Comments	____	_____
Shares	____	_____
Saves	____	_____
Story Views	____	_____
Link Clicks	____	_____
Leads / Sales	____	_____

Step 13: ROI Evaluation
Evaluate the campaign result based on cost and return.
ROI Formula
[
ROI = \frac{Return - Investment}{Investment} \times 100
]
ROI Calculation Table

Particulars	Amount
Campaign Investment	₹_____
Return Generated	₹_____
ROI %	_____

Result
A structured influencer marketing collaboration was successfully designed and managed by identifying a suitable influencer, preparing campaign deliverables, and evaluating campaign performance.
